Wall Mount Kit

Quick Start Guide

Step 2: Amplifier or Receiver and Speaker Wire are Required

Caution! Please choose the appropriate amplifier or receiver according to the output power of your passive speakers

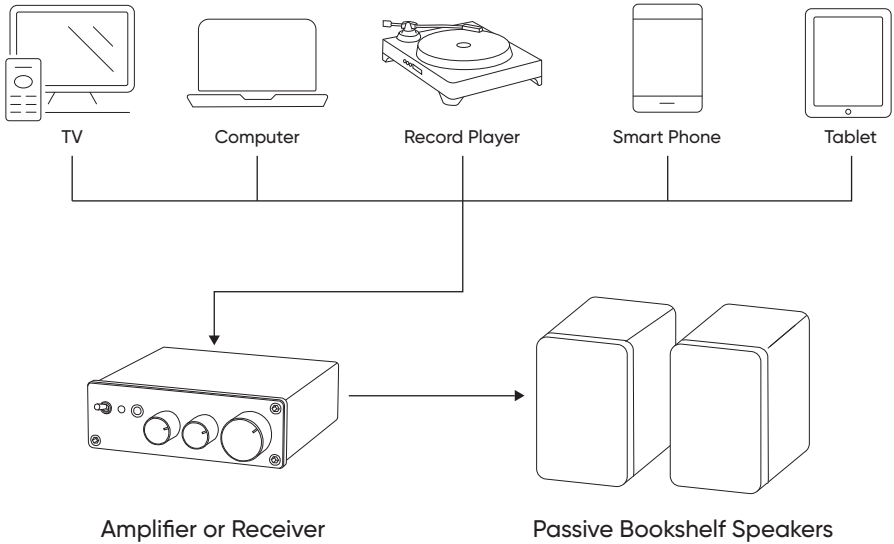

Speaker Wire (Not Included)
16-20 Gauge is Recommended

Amplifier or Receiver (Not Included)

Amplifier or Receiver is Required

Connecting the Passive Speakers with Amplifier via Speaker Wire

Speaker Placement in Surround Sound System

Tips: If you feel the bass is too heavy or the vocals are not enough, you can plug the bass-reflex hole with a sponge.

For speakers with rear ported design, please place them some distance from the rear wall for best effect.
